SELF-WATERING SYSTEM

The self-watering system allows you to cater to your plants' needs without having to water them too often. The drainage holes let out any excess water, so that the plant itself can draw on the contents of the reservoir when it needs them. Some of the pots equipped with this system also have a coating membrane that can be removed to let excess water leak out.

IT

La riserva d'acqua permette di alimentare le vostre piante senza bisogno di irrigarle spesso. I fori di drenaggio permettono di scaricare eventuali eccessi d'acqua, così sarà la pianta stessa ad attingere alla riserva quando ne avrà bisogno. Alcuni vasi dotati di questo sistema presentano anche una membrana di rivestimento che, una volta rimossa, permette all'acqua in eccesso di fuoriuscire dal vaso.

DE

Der Wasserspeicher ermöglicht es Ihnen, Ihre Pflanzen zu versorgen, ohne sie häufig bewässern zu müssen. Durch die Entwässerungslöcher wird überschüssiges Wasser abgeleitet, sodass die Pflanze selbst bei Bedarf aus dem Wasservorrat schöpft. FR

La réserve d'eau permet d'alimenter vos plantes sans devoir les arroser souvent. - Certains légumes produisent plus s'ils sont cueillis souvent comme les haricots, les courgettes, les poivrons et les concombres.

Empfehlungen

- Die richtige Gartenerde ist für den Erfolg Ihres Hochbeetes grundsätzlich, lassen Sie sich von Ihrem Fachhändler beraten.
- Wählen Sie für Ihr Basilio den richtigen Standort. Eine Ausrichtung nach Süden wäre optimal.
- Beachten Sie bei der Aussaat den Abstand und die Tiefe die auf den Samentütchen angegeben sind. Um die Arbeit zu vereinfachen können Sie auch vorkultivierte Pflanzen wählen.

Essential Self Watering

Riserva d'acqua

La riserva d'acqua permette di alimentare le vostre piante senza bisogno di irrigarle spesso. I fori di drenaggio per il "troppo pieno" permettono di scaricare eventuali eccessi di acqua così sarà la pianta stessa ad attingere alla riserva d'acqua quando ne avrà bisogno.

Self-watering system

The Self-watering system allows to feed your plants without having to water it often. The drainage holes for the "overflow" allow you to download any excess water so the plant itself will be to draw on the reserve of water when it needs them.

Some of the pots equipped with this system also have a coating membrane that, once removed, it allows excess water to leak from the pots.

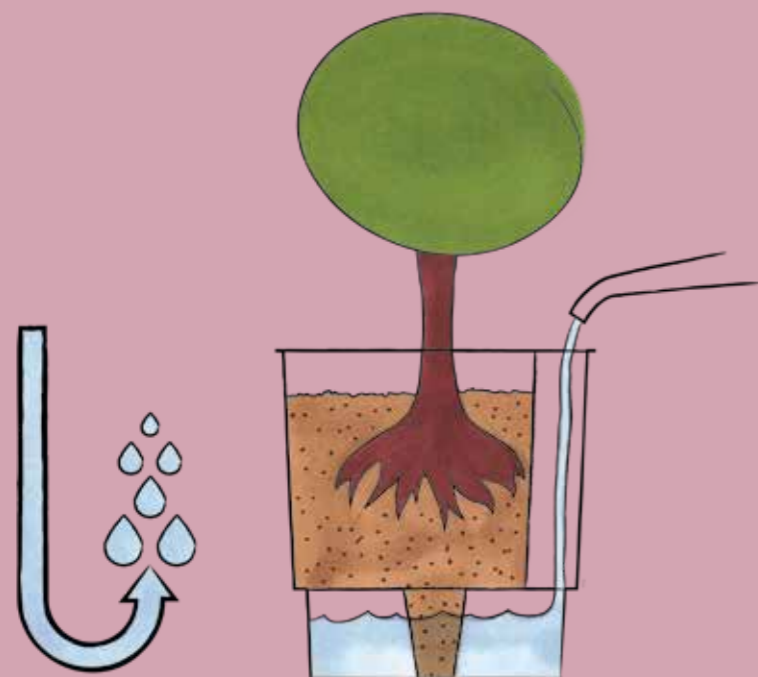

Avec reserve de l'eau

Le réservoir d'eau permet de nourrir vos plantes sans avoir à les arroser souvent. Les trous de drainage pour le «débordement» vous permettent de télécharger tout excès d'eau de sorte que sera elle-même à puiser dans la réserve d'eau quand il en aura besoin. Certains des pots équipés de ce système ont également une membrane d'enrobage qui, une fois enlevé, permet à l'eau en excès de sortir.

Wasser reservoir

Das Wasser-Reservoir ermöglicht, Ihre Pflanzen zu versorgen, ohne ständig Wasser zuzuführen. Die Entwässerungslöcher lassen das Wasser überlaufen, damit die Pflanze das nach Bedarf schöpfen kann.

Einige Pflanzgefäße mit Wasserspeicher besitzen eine Abdeckung-Membrane, die das Wasser, bei Wegnahme, überlaufen lässt.

Evita l'annidamento di zanzare e altri insetti

It stops mosquitoes and other insects from laying eggs

Évite la nidation des moustiques et autres insectes

Das Einnisten von Mücken und anderen Insekten wird verhindert

Per installazione all'esterno. Certificati CE, classe di isolamento IP55, completi di cavo di alimentazione, presa bipolare, lampada. Non sono dotati di interruttore. Si consiglia che l'installazione all'esterno venga effettuata da personale qualificato. Le versioni outdoor sono dotate di un foro e un tubo per il drenaggio dell'acqua che si potrà accumulare nel contenitore. È fondamentale che il foro e il tubo non vengano ostruiti in modo tale da permettere un sicuro drenaggio. Per questo consigliamo di non mettere mai la pianta o la terra direttamente nel contenitore ma di posizionare sempre un sottovaso e un vaso di contenimento di dimensioni appropriate. Pulire frequentemente il foro e il tubo di drenaggio.

For outdoor installation. Certificates CE, IP55 dielectric strength class, complete with power cord, hole plug, lamp. Not equipped with a switch. It is recommended that the installation is made by qualified personnel. The outdoor version is equipped with a hole and a tube to drain water that might be accumulated in the container. It is important that the hole and the tube will not be obstructed

so as to allow safe drainage. Therefore we recommend to never put the plant or the soil directly in the container but always place a saucer and a pot of appropriate sizes. Never put the soil or plant directly into the container. In this way you risk to obstruct the hole and the drainage tube compromising their operation and safety. Please clean frequently the hole and the drainage tube.

Ne jamais mettre la terre ou la plante directement dans le recipient. De cette manière il peut s'obstruer l'orifice et le tuyau de drainage en compromettant le fonctionnement et la sûreté. Mettre toujours un sous-vase ou un vase de la dimension appropriées à la plante. Nettoyer souvent le trou et le tube de drainage.
