Tera® is a responsible project oriented towards the circular economy.

Tera® è un progetto responsabile orientato all'etica dell'economia circolare.

Tera® circular economy

L'economia circolare di Tera®

circular economy

In our field, plastic for domestic waste recycling is the best existing material to **reduce the use of natural resources and minimize the introduction of new waste.**

Nel nostro settore la plastica da riciclo di rifiuti domestici è il miglior materiale esistente per ridurre il prelievo di risorse naturali e minimizzare l'immissione di nuovi rifiuti.

5 company

Green guarantee

Garanzia green

The RE logo is a guarantee of an economic system designed to regenerate itself with a few simple principles to make a big difference. **This is the foundation of the Tera® philosophy.**

Il bollino RE è garanzia di un sistema economico pensato per auto-rigenerarsi con pochi, semplici principi per fare una grande differenza. Qui si fondano le basi della filosofia Tera®.

All Tera® products are PSV certified as manufactured products obtained from the **recycling of plastic waste and production scraps**. This certification includes an annual audit to **guarantee continuity and transparency**.

The iron articles are not PSV certified.

Tutti gli articoli Tera® prodotti in plastica sono certificati PSV in quanto manufatti ottenuti dalla valorizzazione dei rifiuti plastici.

*Questa certificazione prevede una **verifica annuale che garantisce continuità e trasparenza.***

Gli articoli in ferro non sono certificati PSV.

The Pebbles items are certified Plastic Second Life Mix Eco, with minimum 30% recycled plastic content.

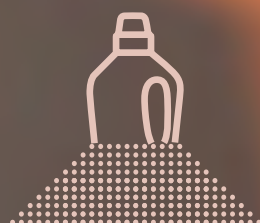

I sassi decorativi Pebbles sono certificati Plastica Seconda Vita Mix Eco e contengono minimo il 30% di materiale plastico da riciclo.

We want to give plastic a new life, making it an ever-reusable resource.

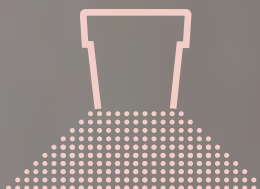

Vogliamo dare nuova vita alla plastica rendendola una risorsa per sempre riutilizzabile.

Self watering system

used in
Insula collection

Riserva d'acqua

The water reserve allows to feed your plants without the need of frequent watering.

—
La riserva d'acqua permette di alimentare le piante senza bisogno di irrigarle spesso.

No mosquito eggs
Anti uova di zanzara

Farewell mosquitoes, this is a no-fly zone!

The self-watering system stops mosquitoes from reaching the stagnant water at the bottom of pots and laying their eggs there.

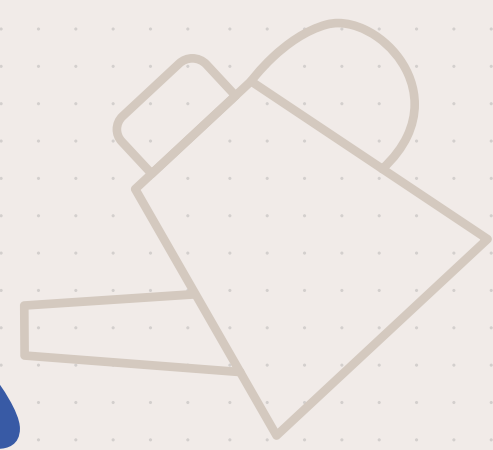

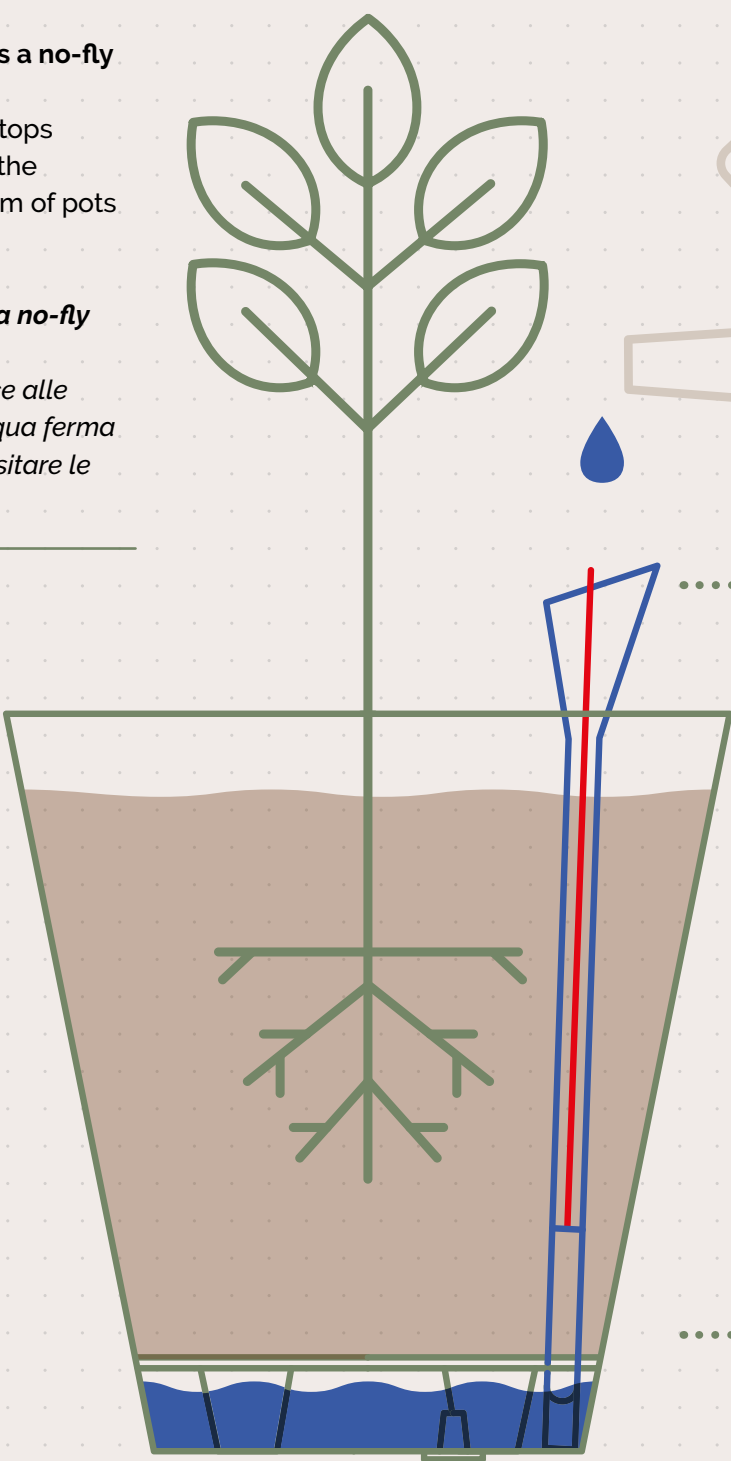

—
Addio zanzare, questa è una no-fly zone!

La riserva d'acqua impedisce alle zanzare di raggiungere l'acqua ferma sul fondo del vaso per depositare le uova.

How it works
Come funziona

The self-watering consists of a reserve of water on the bottom of the pot, that transfers humidity upwards the soil when it dries out. It allows you to cater to your plants' needs without having to water them too often (based on the type of plant and the ambient temperature), so that the plant itself can draw on the contents of the reservoir when it needs them. The drainage hole let out any excess water.

—
Il self-watering system consiste in una riserva d'acqua sul fondo del vaso che trasferisce l'umidità verso l'alto quando il terreno si asciuga. Ti consente di soddisfare le esigenze delle tue piante senza doverle annaffiare troppo spesso (in base al tipo di pianta e alla temperatura ambiente), la pianta può quindi attingere al contenuto della riserva d'acqua quando ne ha necessità. Il foro di drenaggio permette all'acqua in eccesso di uscire.

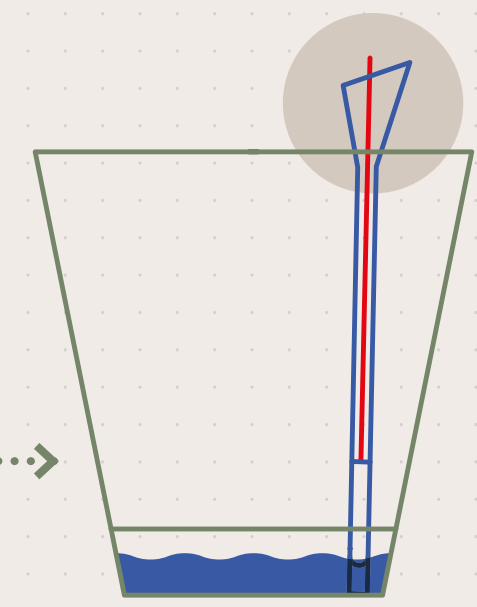

How it works
Come funziona

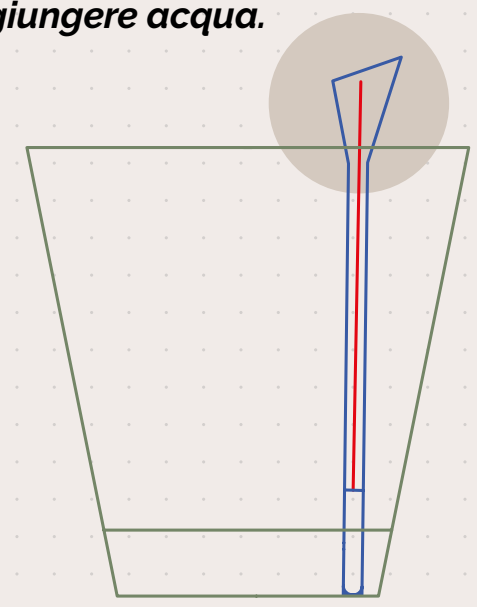

Level indicator
Indicatore di livello

The level indicator shows through a float when water needs to be added.

—
L'indicatore di livello segnala attraverso un galleggiante quando è necessario aggiungere acqua.

How to create holes for drainage

Come creare i fori di drenaggio

rotomould pots

The pots of Petra and Harena collections can be easily drilled to allow the drainage of the water.

I vasi delle collezioni Petra e Harena sono facilmente forabili per permettere il drenaggio dell'acqua.

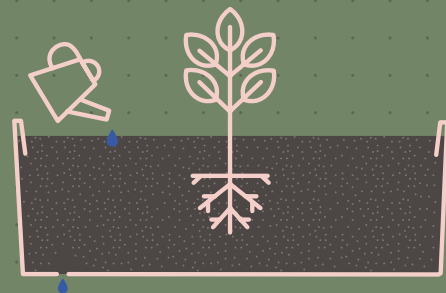

1

Make the holes perpendicular to the surface

Pratica i fori perpendicolarmente alla superficie

2

Excess water comes out of the drilled holes

L'acqua in eccesso esce dai fori praticati

3

Use a saucer if you use the pot in an indoor environment

Utilizza un sottovaso se usi il vaso in un ambiente interno

How to create a self-watering system

Come creare una riserva d'acqua

Sinai and Thar pots

1

Use a drill to place a hole in the specific raised part in Sinai and Thar pots.

Con un trapano fai un foro sull'apposito rialzo dei vasi Sinai e Thar.

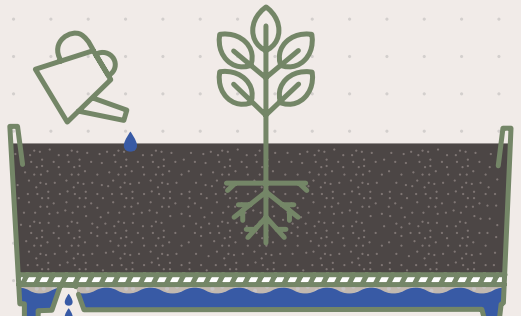

3

Add a layer of clay pebbles on the bottom and spread out the nonwoven fabric, then fill the pot with topsoil.

Inserisci uno strato di argilla sul fondo e stendi il tessuto non tessuto, poi riempi il vaso di terra.

4

Eventually place your plant in soil. The excess water will be spilled out from the hole you made.

Infine interra la pianta. L'acqua in eccesso uscirà dal foro praticato in precedenza.
